

# **Project:**

## Fortune Cookie

### **Description:**

This video game is basic, straightforward, and quick to play. A fortune cookie is a cookie with a piece of paper with a little statement inscribed on it. This statement contains a life message. Each fortune cookie contains a different message for your life. By choosing a random cookie you will be letting luck work for you. As soon as you click on one of the choices, you will receive your message. The message that will come out has already been predestined for you. It may contain a secret, a tip, a teaching for your future, or an important warning sign. Each player receives a distinct fortune cookie, which holds a different message. As a result, your daily message will be determined by your luck.

### **How to use/run the Program:**

The following steps are the procedure for opening, running, and playing the "Fortune Cookie" program:

1. Download the "fortune\_cookie.zip" and place it in your preferred file location.
2. After downloading, extract the "fortune\_cookie.zip" by right-clicking the zip file and choosing the "Extract files..." and a "fortune\_cookie" folder will show up.
3. On PyCharm IDE, click the "file" button on the top left menu and click the "open", and choose the "fortune\_cookie" folder. Then, the "fortune\_cookie" project will pop up in PyCharm.

4. To run the program, open the "scene" folder on the Project tool window and right-click the "\_main\_.py", and press the "RUN" button. Then, the fortune cookie program will show up.

5. To play the game, click the fortune cookie to start and choose one of the three fortune cookies. After that, your fortune cookie message will show up.

### **Software Requirements:**

- Modern Operating System (Microsoft Windows, macOS, and Linux.)
- Windows 10 or Windows 11

### **Hardware Requirements:**

- 64-bit CPU
- at least 1GB of RAM
- at least 5GB of free disk space
